Subs to

An estimate for Rs 7,950/- was prepared by the Sanitary Engineer for laying a duplicate line from the elevated tank upto the 3" sluice valve in pettah at Shukarpur Town, as a water supply improvement work

The estimate has been sanctioned to Rs 7,480/- by the chief Engineer for Irrigation

The local bd, unable to meet the cost of the work, requests sanction to a grant of Rs 5000/ from the prot and they propose to meet the balance from out of their funds

In this connection, it may be stated that the financial condition of the Shukarpur Town bd, according to the sanctioned budget for 44-45, is very satisfactory - vide items in the mar...

Receipts — Rs 39,923
Exp — 26,079
C B — 13,944

5875

Shenkam pur water supply.

During this year, a sum of Rs 3000/- has been given so far to the Shenkampur Town mcty for Drainage work out of the drainage grant and no grant is given out of the T.D & W S grants

In the above circumstances, the estimate for laying a duplicate line at Shenkampur for Rs 7,480/- as sanctioned by the C E for irrigation may be sanctioned

A

As there is a closing balance of Rs 13,044, The mcl is in a position to give half of the cost of the work. Hence, the cost may be met equally by the govt and the mcl. The govt share of the cost viz Rs 3740/- may be given out of the W S grant for 64-65

B

as a sum of Rs 30,000 is still available out of the provision of Rs 130,00

A and B are subject for orders

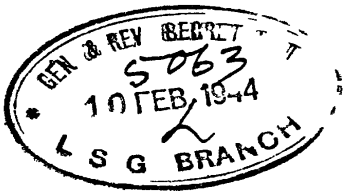
Encls

To The Secretary to Government,
Law Department,
BANGALORE



Sir

Sub - Water Supply Improvement Work - Shikaripur Town Municipality - Estimated cost Rs 7970/-

Dno 2826

Adverting to para 2 of G O No L 600-3/TM 68-43-7 dated 11-12-43, stating that the proposal of the Shikaripur Town Municipal Council for sanctioning a suitable grant towards Water Supply of the Town would be considered separately on receipt of specific and detailed proposals with plans and Estimates, I have the honour to forward herewith in original, report No MC46/43-44 dated 10-1-44 received from the President, Shikaripur Town Municipality on the subject noted above and to state as follows -

2 The Municipal President states, that a regular estimate with plan has been got prepared by the Sanitary Engineer, Bureau of Sanitary Engineering Bangalore, for improvement of Water Supply of Shikaripur Town ie , for putting in 4" C I Line in place of existing 3" C I line from the balancing Tank

3 The Scheme is estimated to cost Rs 7970/- The Municipal Council considered the question of financing the Scheme at its meetings held on 17-12-1943 and 10-1-44, when resolutions were passed to the effect that Government might be approached for sanctioning a grant of Rs 5000/- towards the purpose The balance of the estimated cost is proposed to be met from the General balances of the Municipality

4 The Municipal Council President requests that a recommendation might be made to Government for sanctioning the grant of Rs 5000/ from out of the current years water Supply grant, to enable the Municipal Council to take up the Scheme for execution

5 In these circumstances, I request that sanction of

Government may kindly be obtained to the grant of Rs.5000/- to the Shikaripur Town Municipality to enable it to undertake the water Supply improvement work, referred to in para 3 supra, during the current year The excess cost over the Government grant of Rs 5000/- will be met from the general balances of the Municipality

The Estimate and plan accompany for favour of reference and orders

I have the honour to be,
Sir,
Your most obedient servant

- Deputy Commissioner,
Shimoga District

Estimate for duplicating the line from the elevated tank upto the 6" sluice valve in the Pettah in Shimoga Town

---

Sir,

With reference to your letter No L 6077 dated 20th December 1944 returning the above estimate for Rs 7,950/- for retransmission after necessary action, I have the honour to retransmit the estimate with report and plan together with the original estimate A copy of letter No 906 dated 28th February 1945 of the Sanitary Engineer furnishing replies to points raised in the letter under advertance is also enclosed for the information of Government

I have the honour to be,

Sir,
Your most obedient servant,

DIRECTOR OF PUBLIC HEALTH

Letter No 90[illegible] dated 28th February 1945 of the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the Director of Public Health in Mysore, Bangalore

---

Re Estimate for improvement of water supply to Shimoga town

With reference to your Memo No C 6057-8 dated 15th January 1945 forwarding copy of letter No L 6077 dated 20 12 1944 of the Secretary to Government, Law Department on the above subject, I have the honour to state as follows

1 The estimate is prepared in accordance with the design worked out in this office and the section and size of pipe line has been determined as per calculation noted below There are about 300 houses in the street of Haralenne Kery, Doddakere, Kajjikere, Hirekery, Kadekery, etc , which the proposed line will command when laid Taking an average population of 6 per house and a supply of 10 gallons per head per day the total quantity of water required for this locality is 12,000 gallons and this quantity is assumed to be supplied in 8 hours

Therefore the rate of discharge in the pipe line is

$$G = \frac{12,000}{8} \times 1/60 = 25 \text{ g p m}$$

The length of the pipe line L - 3,000 ft or 1,000 yds

The head of discharge from the tank to point of delivery being 50 ft the size of pipe required

(From Boxes formula $d = \frac{G2 \times L}{h} 1/5 \times 1/3$

$$d = \frac{25 \times 25 \times 1000}{50} \times 1/5 \times 1/3$$

$$d = 2"$$

But the minimum section of C I pipes obtained from the Mysore Iron and Steel works being 3" size , this section has been proposed as the 2" G I pipes are far too costly than the 3" C I pipe line and also to allow for circulation losses later on

2 From a kind perusal of the plan showing the proposed pipe line it may be seen that the present 3" line is not proposed in pettroad as a duplicate line alongside of the existing main, but in the localities of Haralennekery, Hosakery, Khajikeri and other localities of the towns where there are no pipe lines and the present proposal is not only to relieve the excessive strain on the existing single main in pettah road but also to serve the long-felt needs of the southern portions of the town which are higher and experience great difficulty in supply through a single main of 3" line in pettah road by a 4" line as was originally contemplated works out to about Rs 10,480/- at the current rates as per detailed estimate, enclosed herewith The proposals to lay a 4" main throughout in place of the present 3" main and continue the released 3" pipe to lower areas will not solve the problem of supplying higher areas independent from a lower to a higher point. Just a replacement

3 The 3" old pipes so laid will be released and continued when it is found necessary to increase the capacity of the transmission system later on due to expansion of the town

4 The original and the modified estimate for the 4" line are enclosed, together with the estimate amounting to Rs 7,900/- for laying the duplicate line from the elevated tanks behind pettah road

All commected records accompany The 3" duplicate line is cheaper and more useful
